Guideline for Siddha Practitioners for Home Quarantine
COVID-19 Patients

Ministry of AYUSH
Govt. of India
Preamble

COVID-19 has burdened Indian public health system as like other countries. The absence of any clinical symptoms of COVID-19 termed as asymptomatic holds a vital role in the transmission of the disease. Prevalence of asymptomatic individuals among the COVID-19 infected people is about 40-45%. Asymptomatic and mild symptomatic cases and close contacts of COVID-19 positive cases have been asked to quarantine in their home itself.

General Disclaimer

- This guideline is in addition to the Guideline for Siddha practitioners for COVID-19 by the Ministry of AYUSH, Govt of India
- In all severe cases, immediate referral to a higher medical center as per the Government guidelines is advised.
- Patients with co-morbidities like hypertension, diabetes etc., are advised to continue their respective medications.
- Doses for children should be adjusted according to their age.

(The symbol of snowflake 🌨 indicates Thatpa Veeiryam with cooling properties, and symbol of Sun ☀ indicates Veppa Veeiryam with hot properties. Considering these properties and the symptoms, suitable medicines are to be used.)

Management Guideline for Home-Quarantine COVID-19 Patients

The common clinical features observed in mild COVID-19 cases include sore throat, mild fever, headache, body-ache, nasal congestion, diarrhea & loose stools, nausea & vomiting and dry cough. Although a variety of symptoms are being reported, many cases are asymptomatic, and some uncommon clinical manifestations include loss of smell and taste.

Some of the asymptomatic cases can be in the pre-symptomatic stage. Considering this possibility, the patient should observe evolving symptoms or signs. This watchfulness should not lead to undue anxiety.
Specific measures for home quarantine COVID-19 Patients

<table>
<thead>
<tr>
<th>Stage/condition</th>
<th>Clinical Presentation</th>
<th>Medicine</th>
<th>Dosage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asymptomatic COVID-19 Patients</td>
<td>--</td>
<td>Kaba Sura Kudineer (KSK)*</td>
<td>5 ml to 60 ml as per the advice of the physician for 14 days</td>
</tr>
<tr>
<td></td>
